*Voice interpreter will be provided.*

**Mark Zaurov,  
Ph.D. candidate  
Universitat Hamburg**

- ✦ This presentation will deliver new information never shared before.
- ✦ There is little information about the Deaf Jewish Life in Germany and Eastern Europe during the 1940s and the Holocaust.
- ✦ This research presents evidence that supports the establishment of a Memorial for Deaf Jews.
- ✦ The current discussion on preimplantation genetic diagnosis (PID) and the DNA of the Deaf brings back the issue of Eugenics and Euthanasia (Action T4, from Nazi Germany).
- ✦ Should Deaf Jews be included in the memorial for T4, if this means not having our own?
